

Zahir Al Omairi has over 15 years of experience in Oman's energy market. With a strong background in both technical and commercial aspects, he began his career as a Process and Chemical Engineer before moving into drilling and completion engineering. Over time, Zahir progressed to leadership roles and project management across various projects. At bp Oman, he led the In-country Value (ICV) activities, establishing the bp Oman ICV team and developing forward-looking ICV strategies. Additionally, Zahir plays a key role in bp Oman's renewable business development team, overseeing procurement and supply chain activities, and driving engagement with

local and international suppliers to maximize the value added to the development of green hydrogen both locally and globally. Zahir is passionate and an expert in sustainable supply chains and building a green hydrogen local value chain.
